CORE CAPABILITIES

• Advisory & Assistance Services

Program management, acquisition support, strategy, risk, budget, and performance analysis.

• Systems Engineering & Integration

Architecture, requirements, integration, verification, sustainment, and technical analysis.

• C5ISR, Mission IT & Cybersecurity

Secure systems, networks, cloud, system administration, and operational technology support.

• Modeling, Simulation & Mission Planning

High-fidelity analysis, course-of-action development, and decision-ready mission products.

• Training, Readiness & Operations

IQT/MQT/CT, curriculum, Stan/Eval, facilities, logistics, administration, and mission assurance.

THE GSI ADVANTAGE

Mission credibility

Performance across strategic deterrence, C2, homeland defense, and protective operations.

Workforce continuity

National recruiting, cleared talent, high retention, and rapid onboarding.

Operational control

DCAA-compliant accounting, ISO-certified systems, and disciplined reporting.

Strategic access

8(a), HUBZone, SDVOSB/VOSB, DOT DBE, and direct access to senior leadership.

REPRESENTATIVE PAST PERFORMANCE

608 AOC

Air operations C2, mission systems, training, exercises, and Stan/Eval.

SMAC

Standoff-weapons planning, modeling and simulation, and COA analysis.

NC3 CENTER

Systems engineering, integration, risk analysis, sustainment, and T&E.

AFNORTH / WADS

Homeland-defense mission IT, secure facilities, readiness, and continuity.

DHS FPS REGION 7

Protective-operations administration, risk management, and mission support.
